Overview: Purpose of Tool

How effective is our process for thinking about business issues and aligning and executing strategies to drive growth?

The OAI is a tool that allows you to assess your organization's effectiveness by identifying key issues so that you can then align and execute strategies that drive improvement and growth. The assessment's results help you determine whether or not your firm has developed and implemented strategies and processes that will insure its long-term viability, competitiveness and success. It offers insight into key stakeholder (management, employees, and others) perceptions of the company operations and practices across various levels of the organization. It helps to focus the areas that your management team may use to build business and leadership capability.

Dimensions: What is Measured

The Organizational Alignment Index summary provides a concise synopsis of survey assessment results. The report summarizes your organization's strategic thinking and planning capabilities on eight critical dimensions.

The 8 different dimensions are listed below:

| Challenging Assumptions: | Having an open mind, willing to challenge accepted beliefs and raise new concerns. |
|--------------------------|--|
| Vital Few: | Focusing on the vital few issues versus tackling everything. Analyzing and concluding effectively |
| | enhances clarity, directs focus and promotes balance. |
| Facts v. Opinions: | Using facts to make decisions and reaching meaningful, valid conclusions; opinions and |
| | conjecture do not provide accurate support. |
| Scope: | Determining the appropriate "scope of analysis" to address the right issues within your control. |
| Linkage: | Connecting ideas both upstream and downstream allows for systematic thinking; what's up front |
| | informs what is to follow. |
| Process: | A structured approach that employs a common language for identifying business issues. |
| Assessment: | Routinely assessing internal and external issues that lead to conclusions and implications for action. |
| Planning: | Creating strategies, measures and developing initiatives that will successfully address overarching |

Overview Rating Scale

The following pages provide a summary of employee responses to the Organizational Alignment Index. The survey statements were rated on a scale, which required a response from among five categories:

1 = Strongly Disagree 2 = Disagree 3 = Somewhat Agree 4 = Agree 5 = Strongly Agree

The statement or dimension averages are based on a 5-point scale, with "5" being the highest possible average and "1" being the lowest average.

| Averages are calculated for the following: | Please note the following term definitions: | | | | | |
|---|---|---|--|--|--|--|
| · Dimension/Section | · Range | The scale used to place calculated averages. | | | | |
| Scoring Statement Questions | · Top Box | The percentage of "5" (Strongly Agree) responses. | | | | |

Participation Summary

The participation summary provides a concise breakdown of responses. The charts below summarize the numbers and percentages of

participation segmented by specific groupings.
